Technical specifications

	TR30 petrol	TR30 diesel
Force of impact	30 kg	30 kg
Vibration frequency	81 Hz	81 Hz
Width	50 & 60 cm	50 & 60 cm
Operating weight	195 kg	230 kg
Engine	Honda GX160	Hatz 1B20
Power output	4 kW	3,4 kW
Travel speed	20 m/min	20 m/min

TR30

The **SAMAC** TR30 is an all-round infinitely variable reversible vibratory plate. It is suitable for both compaction jobs and interlocking paving tile, so one machine can do the entire job.

This vibratory plate manages on any type of soil, which is rather special for this is one of the 'lighter' types of reversible plates.

Thanks to the materials used for this design, and the innovative construction, the costs of maintenance are very low. Regular service is restricted to the engine and the V-belt. The hydraulic system of the shifting mechanism is provided with a buffer, so unexpected leakage will not result in an immediate standstill.

The following options are available:

- Diesel or petrol
- Electric start on request
- Width of plate 50 or 60cm
- Colours: traditional yellow, Samac silver or your own colours
- Pneumatic tyres for easy transport

The design of the TR30 is based on years of experience. This reversible plate is remarkable for its simplicity of construction.

To try this vibratory plate for yourself, you are very welcome in our factory in Zwolle.
